

2" DRAINABLE LOUVER

Extruded Aluminum 2" (51mm) Deep Drainable Blade.

High performing louver designed to be integrated in a curtainwall or storefront system.

Drainable blades divert water to jambs and out through the sill.

Features:

- Frame: 2" (51mm) deep frame. 1.5mm thick 6063-T5 extruded aluminum for frame and blades.
- 2-1/2" blade spacing.
- Blades attached by screw spline concealed in frame.
- Can be supplied with bird screen or blank off panel.
- Blade reinforcing available with 1" x 1" L angle.
- Extruded with glazing pocket flange to minimize air and water leakage at curtainwall or storefront transition.
- Minimum size: 8" x 8".

Standard Finishes:

- Clear anodized.
- Black anodized.
- Mill finish.
- Custom paint or powder coat finishes available.
